

Transformative research on ocean governance
Introduction to realist social science research

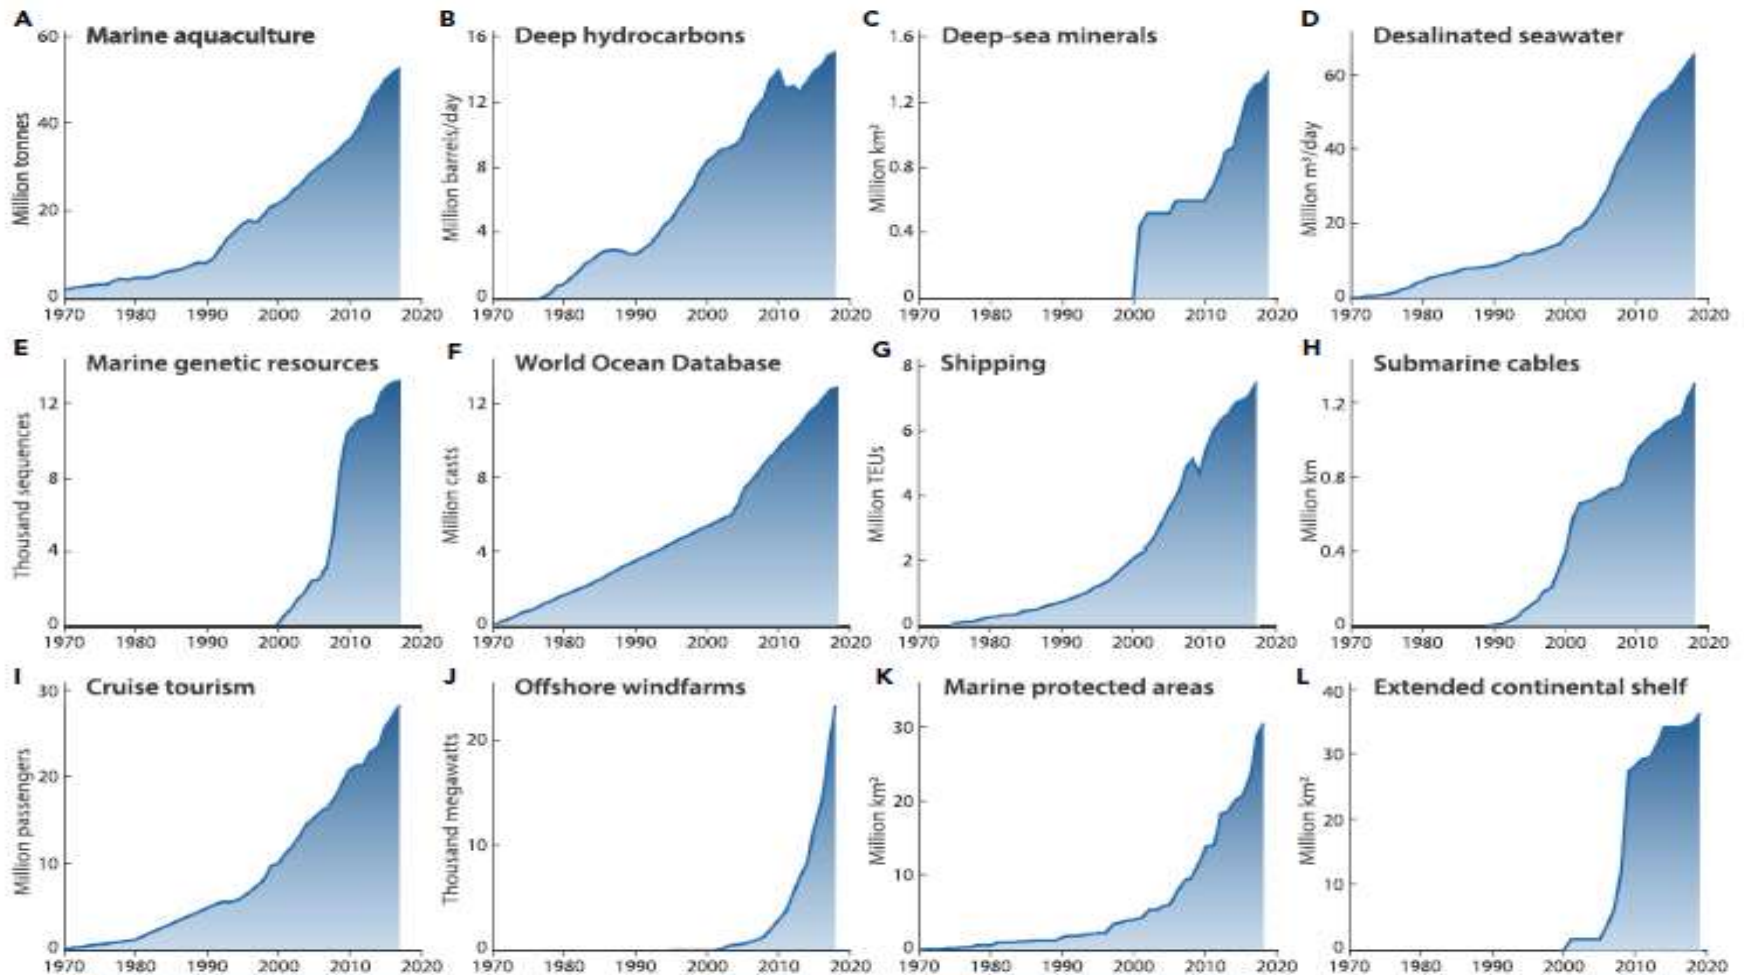

Sebastian Unger
Research Group Leader, Ocean Governance

Ocean Governance

Quelle (angepasst): Franke et al. 2020: Operationalizing Ocean Health. One Earth

„Blue Acceleration“

Transformative Ocean Governance Research

Research Example: „High Seas“ Governance

Areas Beyond National Jurisdiction (ABNJ)

71% of the planet
are covered by
oceans

~ 60% of the
oceans are high
seas

Supported by:

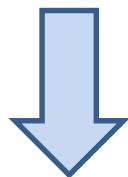

Federal Ministry
for the Environment, Nature Conservation
and Nuclear Safety

based on a decision of the German Bundestag

Research Example: „High Seas“ Governance

Transforming High Seas Governance

Analysing the applicable governance framework

- Understanding legal and institutional interplay

Supporting international efforts towards a new legally-binding BBNJ instrument

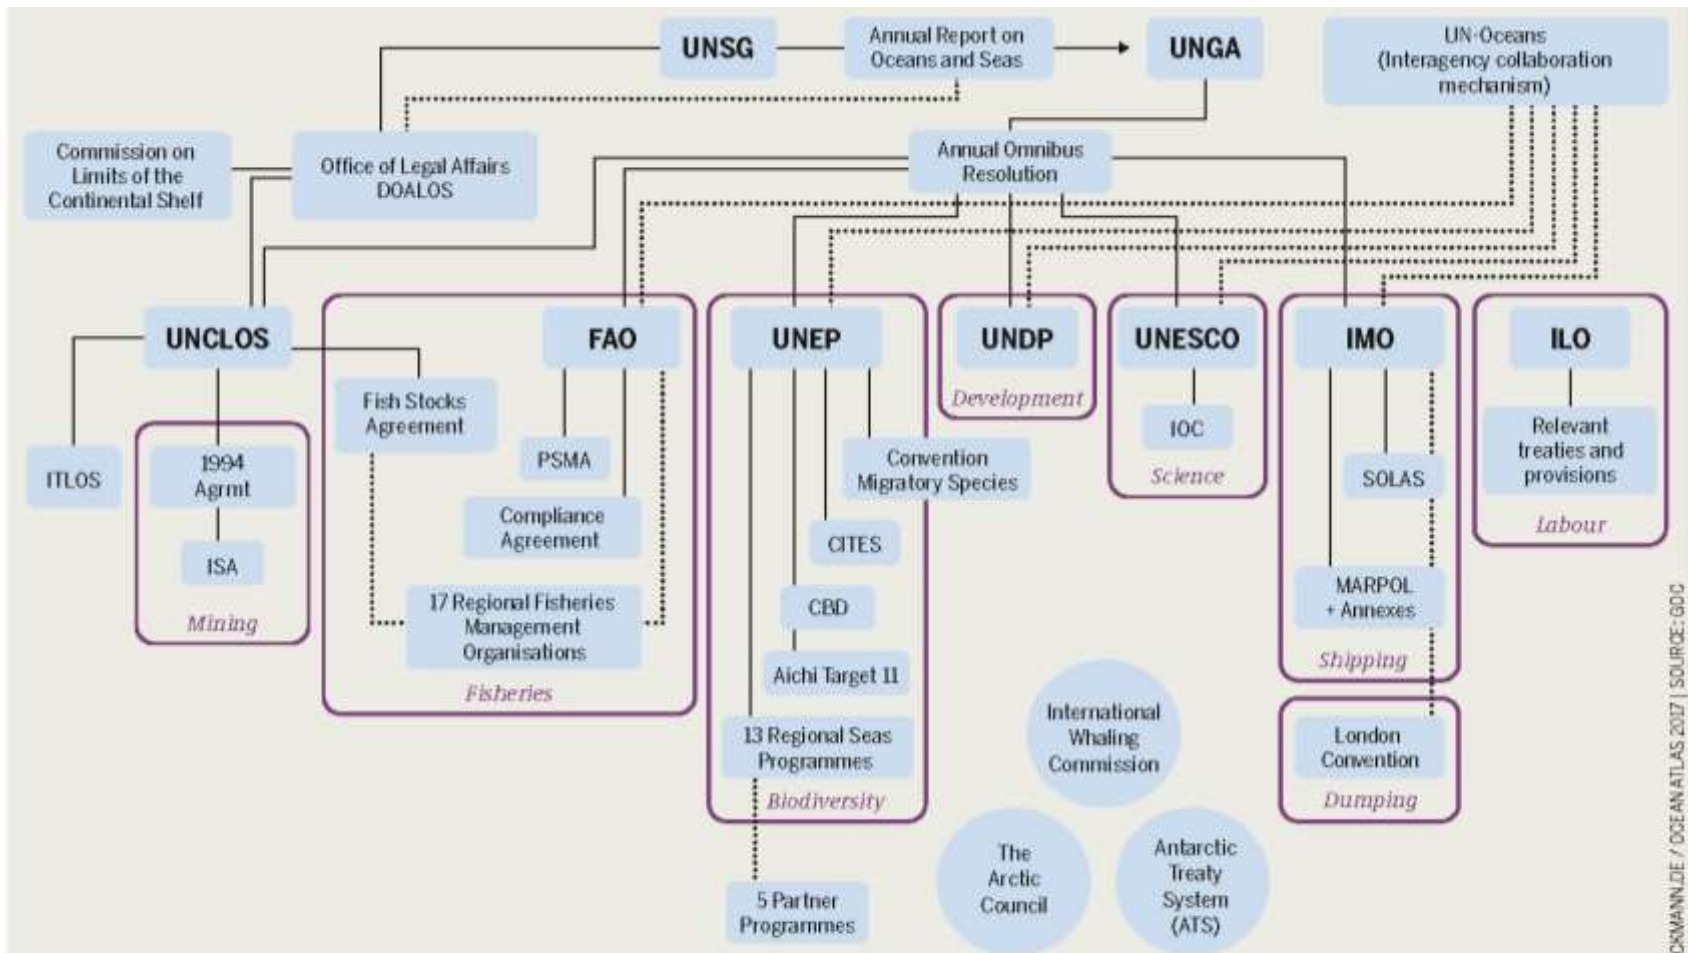

- UN negotiations, IGC 1-4

Facilitating regional ocean governance

- Advancing regional cooperative approaches

Complex & fragmented institutional framework

CBD Convention on Biological Diversity; **CITES** The Convention on International Trade in Endangered Species of Wild Fauna and Flora; **DOALOS** Division for Ocean Affairs and the Law of the Sea; **FAO** Food and Agriculture Organization [of the United Nations]; **ILO** International Labour Organization; **IMO** International Maritime Organization; **IOC** Intergovernmental Oceanographic Commission; **ISA** International Seabed Authority; **ITLOS** International Tribunal for the Law of the Sea; **MARPOL** International Convention for the Prevention of Pollution from Ships; **PSMA** Agreement on Port State Measures to Prevent, Deter and Eliminate Illegal, Unreported and Unregulated Fishing; **RFMOs** Regional Fisheries Management Organisations; **SOLAS** International Convention for the Safety of Life at Sea; **UNDP** United Nations Development Programme; **UNEP** United Nations Environment Programme; **UNESCO** United Nations Educational, Scientific and Cultural Organization; **UNGA** United Nations General Assembly; **UNSG** United Nations Secretary-General

Regime interplay in ABNJ. What are the challenges?

Policy, Legal and Environmental

- Regulatory and legal **uncertainty**
- **Lack of coordination** between sectors, governance levels and actors
- **Duplication** of efforts and high transaction costs
- Difficulty to achieve **policy coherence** and implement **integrated management**
- Difficulty to implement **cross-sectoral policy agendas** for sustainability such as the 2030 Agenda, ocean/climate, biodiversity

→ **But not all negative:** Potential to increase diversity, global learning processes and flexibility of the system

Different analytical problems

Understanding the issue

- **What type of interactions / fragmentation?**
 - Synergistic, cooperative, conflictive
 - Institutional, norm conflicts, actor constellations
 - **What are the causes of fragmentation?**
 - Legal framework, sectoral approach
 - Path dependencies and more...
 - **What are the consequences?**
 - **How to improve institutional interplay** and manage fragmentation?
- **Creating knowledge** for under-researched issue in sustainability science & to inform BBNJ process

Negotiation of a legally-binding BBNJ instrument

Marine Genetic Resources

Environmental Impact Assessments

Area-based management, including MPAs

Capacity Development and Technology Transfer

BBNJ Working Groups

Preparatory Committee

IGC 1

IGC 2

IGC 3

Online consultations

IGC 4 (planned)

Agreement

2006-2015

2016-2017

2018

2019

2019

2020

March 2021

Supported by:

based on a decision of the German Bundestag

Strengthening Regional Ocean Governance for the High Seas (STRONG High Seas)

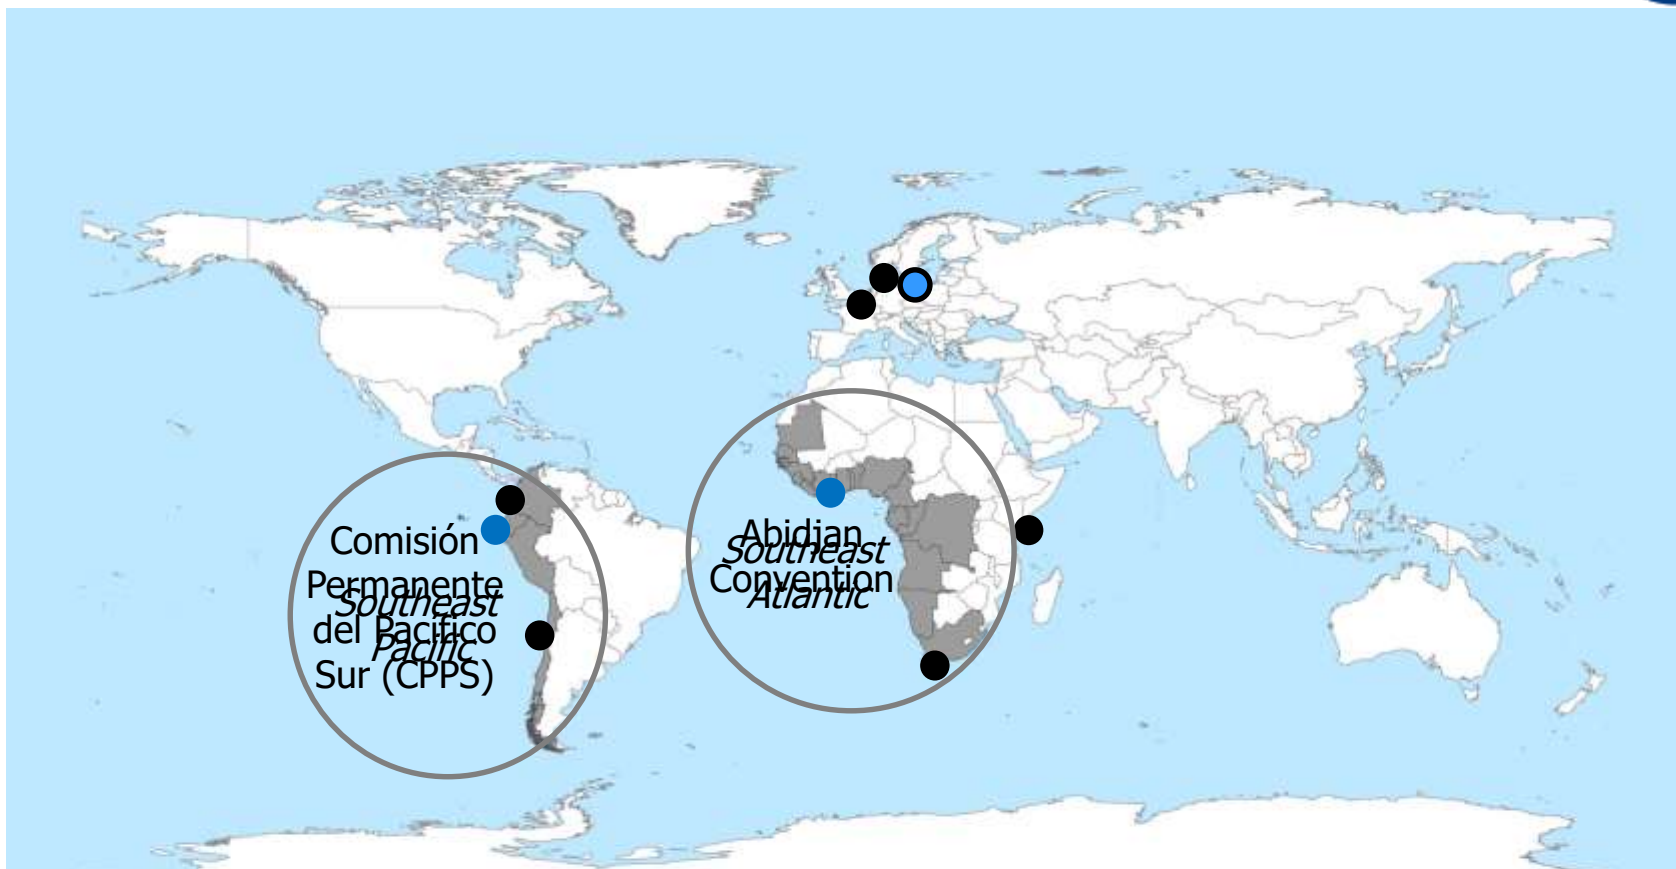

- To **strengthen regional ocean governance** for the **conservation and sustainable use of biodiversity**

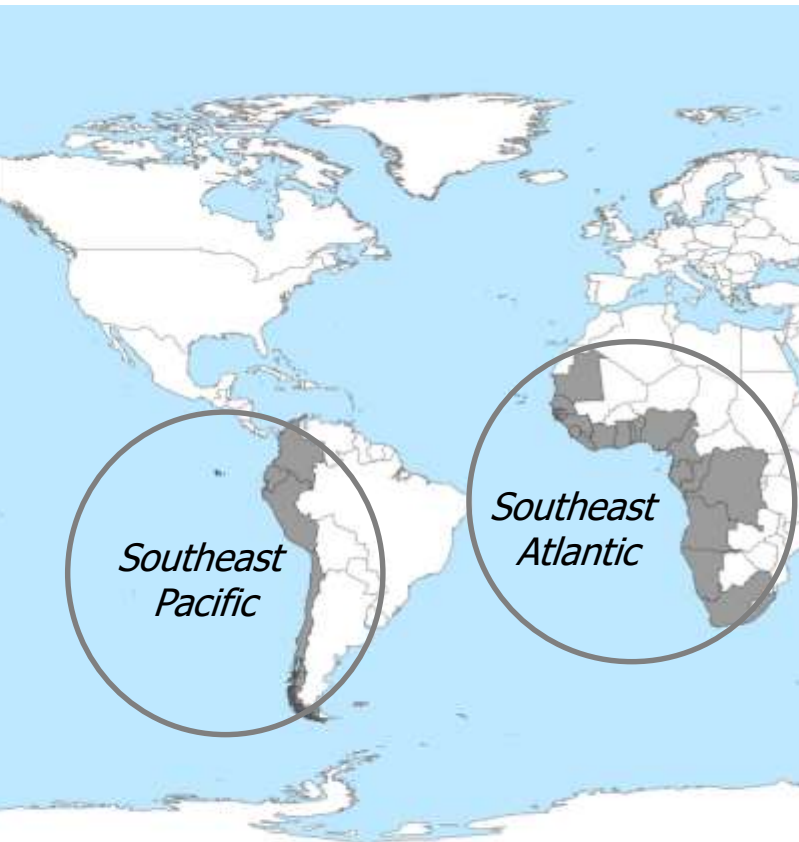

- To develop **integrated and ecosystem-based approaches**
 - within two focal regions
 - between marine regions
 - between regional & global level

STRONG High Seas Project

Enabling Regional Transformations

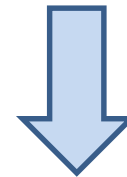

Scientific assessments

- Legal & institutional framework
- Ecological baselines & human pressures
- Socio-economic aspects
- Conservation measures

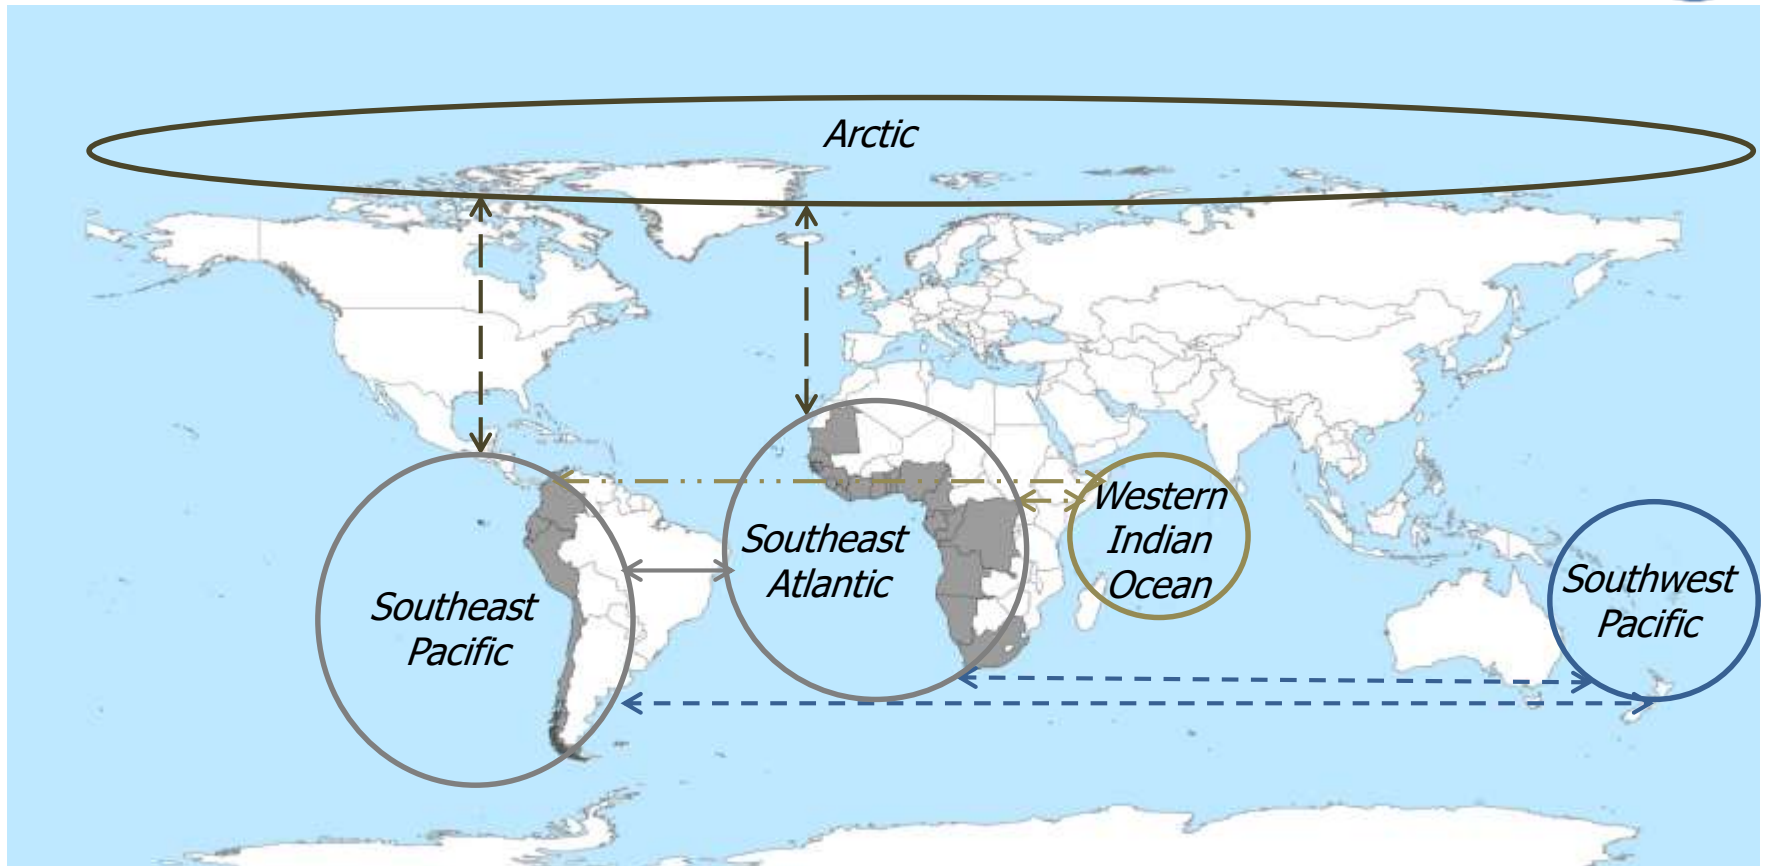

Strategic dialogue with stakeholders

- Co-create new approaches for High Seas governance

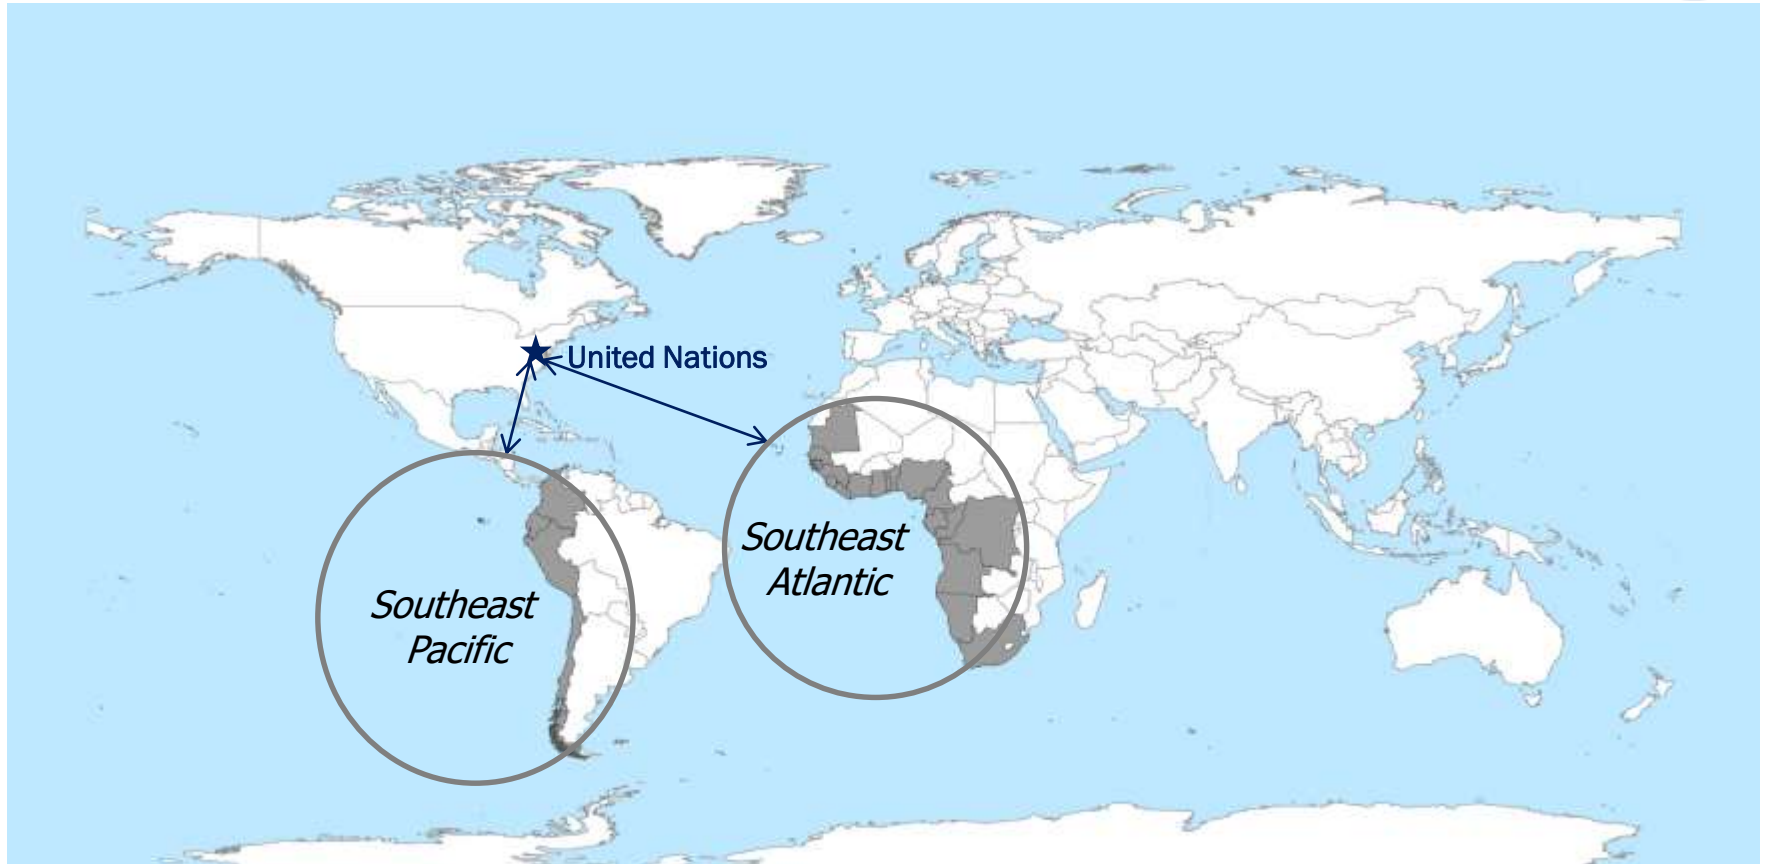

Enabling regional transformations

Dialogue between Marine Regions

Linking Regional and Global Governance

Way forward: Strengthening governance interplay

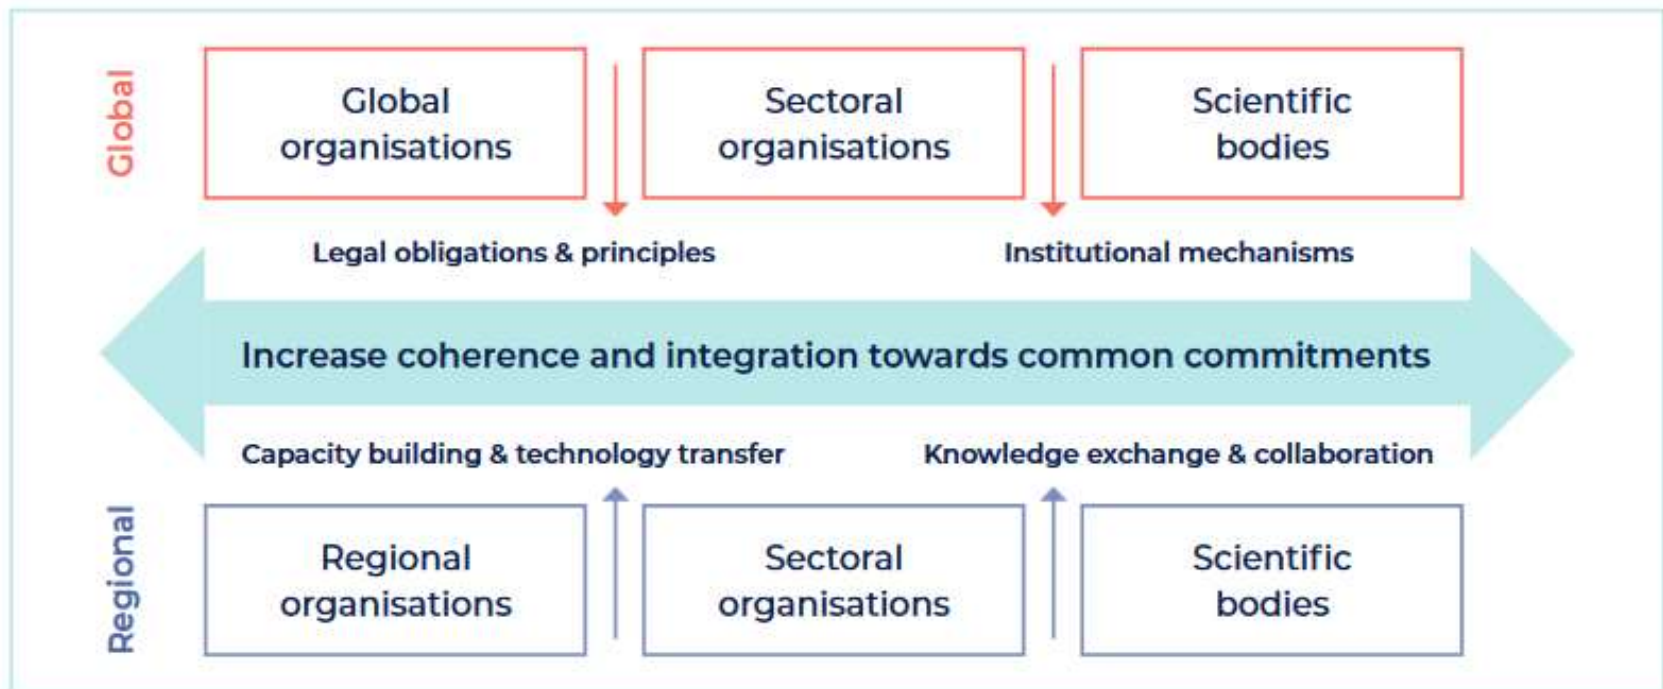

Figure 2: A new agreement will need to increase coherence and integration between and across regional and global institutions, both vertically and horizontally, to enhance the conservation and sustainable use of BBNJ.

Source: Gjerde et al. 2018, STRONG High Seas Project

Example: Marine Regions Forum

Long-term Vision

2017 at the UN Ocean Conference (NY) and Our Ocean Conferences (Malta)

Strives to **facilitate transformations** towards integrated ocean governance for marine regions

Federal Ministry
for the Environment, Nature Conservation
and Nuclear Safety

European Maritime
and Fisheries Fund

Example: Marine Regions Forum

Transformation and Transformative Approach

What?

Transformative^{ive} research explicitly aims to be a driver of change by advancing and facilitating processes of societal change.

How?

Hosting participatory spaces e.g. Marine Regions Forum conference, workshops, stakeholder engagement processes.

Example: Marine Regions Forum

Transformation and Transformative Approach

What?

Transformative research explicitly aims to be a driver of change by advancing and facilitating processes of societal change.

Transformation research studies the conditions, mechanisms and causes of processes of social change. Generates descriptive or analytical knowledge.

How?

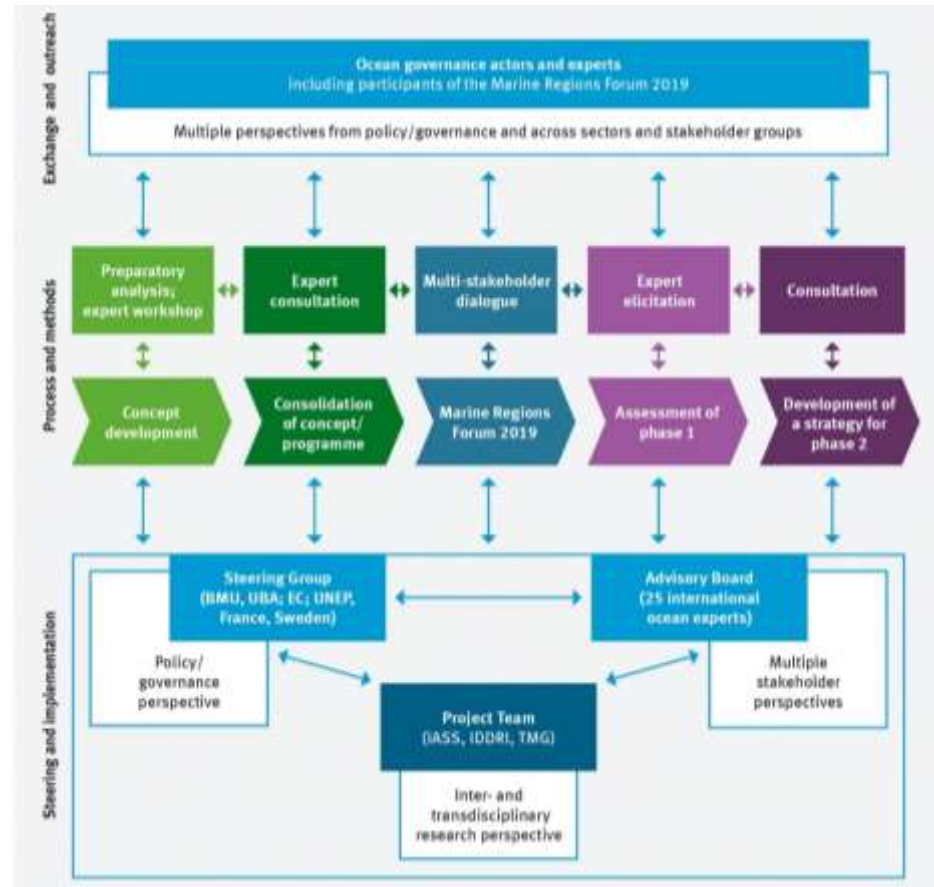

Hosting participatory spaces e.g. Marine Regions Forum conference, workshops, stakeholder engagement processes.

Assessment of the participatory spaces (Marine Regions Forum) through quantitative and qualitative research methods and self-reflexivity. ■

Marine Regions Forum Concept

- Applies **co-creative, transdisciplinary, and participatory approaches**
- Engages **multi-stakeholder and cross-sectoral** actors to strengthen cooperation and **trigger transformative change** at the **regional level**

Figure from: Neumann et al. : Marine Regions Forum: An international stakeholder forum to strengthen regional ocean governance. - Umweltbundesamt, Texte XX/2021, Dessau-Roßlau. In Press.

What did the Forum deliver?

1. Conference outputs (short-term):

- Key Messages document
- Conference report
- IISD Reporting Services, Earth Negotiations Bulletin (ENB)

2. Outcome examples (mid-term):

- Recommendations submitted to the Stakeholder Consultation 2020, UN Ocean Conference
- Cooperation between WIOMSA and Seychelles Conservation and Climate Adaptation Trust (SeyCCAT)
- New cooperation between the Germany (BMU) and Caribbean Environment Programme
- German Sustainable Development Strategy

IISD/ENB 2019

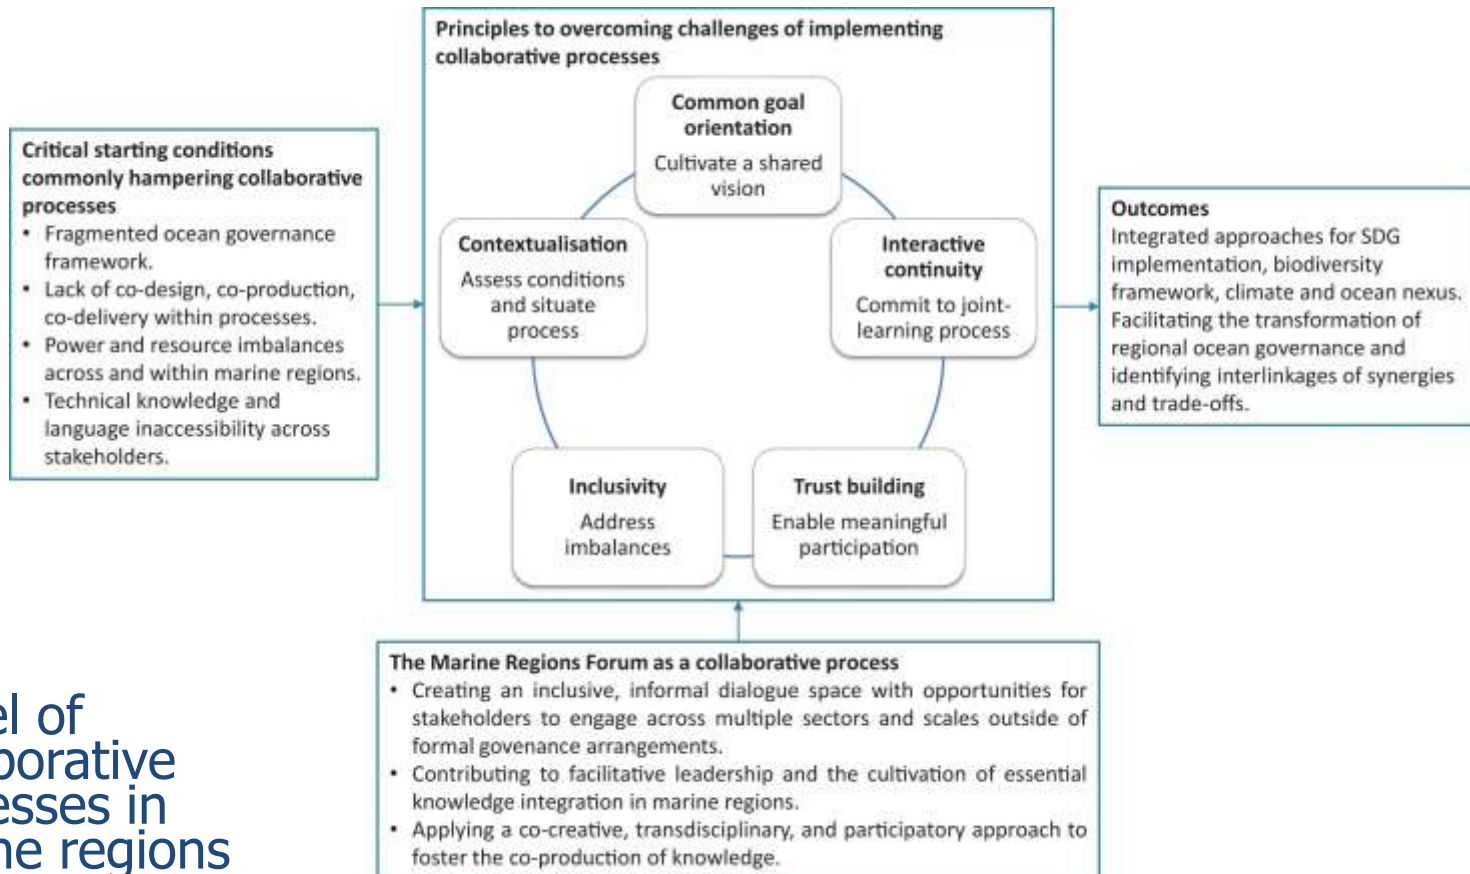

Transformation Research - Results

Initial State

Transformative process

Desired state

Model of collaborative processes in marine regions

Added value of the Marine Regions Forum

1. Regional contextualisation of global frameworks
2. Foster facilitative leadership and support knowledge integration across sectors
3. Support of cross-sectoral, joint learning as a matter of practice - utilising knowledge within rather than for processes
4. Recognition of the need for common (regional) goals and collective harmonised action

Lessons learned from the Marine Regions Forum

- Transformative potential lies within the co-creative and transdisciplinary approach
- New exchanges, perspectives, arrangements, and cooperation that allow for working fundamentally differently
- Orientation of collaborative landscapes available and how to engage in them, especially as such efforts and practices are still uncommon
